| Problem To streamline the custom software database installation process via ECS Assistant for Drop 4P and above, it is necessary to provide subsystem DBO accounts (e.g., pdps_role) with SSO role permissions. This will allow the creation of subsystem DB user accounts via the sp_addlogin command when the ECS Assistant DbBuild function is called to create a subsystem database. | | | |
| Proposed Solution Grant SSO role to all current and new DBO accounts in the Mini-DAAC, VATC, and remote DAACs. To track the generation of new DB accounts, subsystem development will submit a CCR listing the details of the new accounts which will then be created via the ECS Assistant DB scripts at the time of installation. Request completion by 5/11/98. | | | |
